At Next Level Recovery, we have a solution. ***We are an addiction rehab and mental health facility in Salt Lake City, Utah with extensive experience specializing in addiction recovery treatment and counseling.*** In addition to being licensed by the state of Utah, we are also certified by the Joint Commission, which speaks volumes regarding our standards of care. ***If you, a relative or friend requires treatment for opiate addiction in SLC, please get in touch with Next Level Recovery for a free assessment .***

What is Opiate Addiction?

Opiates fall in a category of substances known as opioids. ***Most opiate addictions begin with a prescription for chronic pain.*** When opiates are consumed regularly, they ***alter the brain's reward mechanism, which eventually leads to dependence.*** Some of the commonly abused prescription opiates include Morphine, Codeine, Hydrocodone (Vicodin), and Oxycodone (Percocet, OxyContin). Prolonged opiate use may lead to addiction and may cause grave financial, career and family issues.

Signs of Opiate Addiction

The most effective way of averting opiate dependence from developing is by detecting the drug abuse early. However, if you fear that someone may be hooked to the substance, there are various psychological, behavioral and physical symptoms to observe. Some of the tells of opiate addict behavior include:

- Psychosis
- Euphoria
- Depression
- Anxiety attacks and increased anxiety
- Irritability
- Needle marks on the limbs, indicating intravenous injection
- Constricted Pupils
- Shallow breathing
- Sleepiness and reduced movement

- Flushed, itchy skin
- Recklessness even in a potentially precarious situation
- Stealing the medications, or 'doctor shopping' to obtain extra prescriptions is also another common indicator that someone may be battling an opiate addiction.

Treatment for Opiate Addiction

At Next Level Recovery, ***we engage recovery specialists, counselors and therapists to tailor a treatment program that will cater to our client's individual needs.*** Our opiate addiction treatment programs pander to more than the client's opiate abuse. Our custom sobriety plan also ***addresses other psychological issues that may accompany disorders associated with substance use.***

Our specialists work in tandem with the client to set reasonable goals as they ***learn to cope with daily situations and triggers*** that could elicit a relapse. As such, they learn stress management and also develop coping stratagems through experiential and evidence-based modalities. We use are numerous techniques in our opiate addiction treatment center to help clients overcome their behavior.

One-On-One Therapy

We understand that addiction can only be overcome by changing one's behavior patterns. As such, clients meet with therapists individually, as they focus to ***understand the root of the behavior and prevent relapse.***

Group Therapy

Group therapy is a crucial part of the recovery process, as patients ***learn from others' stories that they are not alone***. Similarly, learning from each other's experience helps patients to hone skills that not only help them to overcome addiction, but also prevent relapse.

Outpatient Program

Apart from our inpatient program, we have an intensive outpatient treatment for opiate addiction to ensure that our clients are coping well, which greatly minimizes the possibility of a relapse. ***Our flexible outpatient program allows clients to continue with their regular endeavors, such as school and work as they undergo treatment.*** Next Level Recovery can also recommend opiate addiction support groups to ensure that you get all the help you require.

Sober Living Housing

We have partnered with an exclusive provider of sober living housing. Sober Living Properties provides a structured setting where opiate addiction recovery can take place harmoniously, with the help of caring peers and competent staff.
